

General Information

CFM Terminal Diffusers provide cost effective HEPA or ULPA filtered air for cleanrooms and laminar flow devices.

Worldwide applications include but are not limited to aerospace, automotive, electronics, plastics, pharmaceuticals and semiconductor manufacturing.

Available in 99.99% and 99.9995% efficiencies, each filter is tested to accepted procedures as described by the Institute of Environment Sciences (IEST) and/or ISO standards.

Features

CFM Terminal Diffusers feature low pressure drop, uniform airflow @ 100 FPM +/- 20%, 2" high collar for a secure connection, and are lightweight for easy installation.

General Specifications

- Anodized extruded aluminum frames.
- Potting material completely encapsulates pleats on all four sides.
- Hood is galvanized steel.
- Available with 10" or 12" duct collar.
- Damper is adjustable from roomside.
- A white epoxy powder coated steel grille protects filter media from damage.
- Centerboard with access port for disc adjustment and challenge injection.
- Seismic holes or tabs provided for compliance with UBC requirements and standards.
- All Materials used shall be fire retardant and self extinguishing in accordance with Underwriter Laboratories UL 586 and UL900 Classifications.

Available Classes

- UL900 Class 2 HEPA 2.0" (51mm) Media Pack.
- UL900 Class 2 ULPA 2.5" (63mm) Media Pack.
- UL900 Class 1 HEPA 1.61" (41mm) Media Pack.
- UL900 Class 1 ULPA 1.61" (41mm) Media Pack.
