

GATORJAW™

FRAMEWORK SYSTEM

IF YOU CAN IMAGINE IT, YOU CAN PROBABLY BUILD IT WITH GATORJAW

Here's a whole new way to design and build with aluminum. With GATORJAW you can make your display pieces just the way you want them. You get a whole new look with aluminum rails, stamped and plated brackets and button head bolts.

The GATORJAW square thread deep groove technology makes it all possible. A continuous groove thread runs the length of the GATORJAW Frame Rail on all four sides making attachments possible at any point. **No drilling, tapping or welding.** GATORJAW is easy-to-use, strong and very durable.

With **unique panel insert channels** on all four sides you can insert any decor panel material for sides, backs or doors. You can also get the GATORJAW Frame Rail anodized in a wide variety of colors.

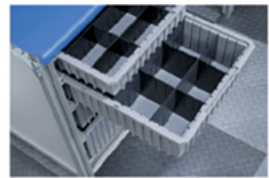

The GATORJAW Frame Rails cut to length easily with only a cut-off saw. This complete framing system includes brackets, hinges, casters, doors, levelers, and more. And many

off-the-shelf hardware items will fit the GATORJAW Frame Rail.

- **New Patented Design**
- **Easily Assembles At Site**
- **Lightweight And Very Durable**
- **Hundreds Of Applications for Building Benches, Cabinets, Wall Systems, etc...**
- **Pieces Can Be Changed Or Re-Configured Easily**
- **Build To Any Configuration Meet Any Size Requirement**

Build on your imagination.
